

# Dish Towel, Microfibre/Cotton

## PRODUCT DESCRIPTION

Genuine quality dish towels made with microfibre cotton are up to three times more absorbent than conventional linen or cotton towels.

The special formulation of 60% microfibres (polyester and polyamide) and 40% cotton ensures these innovative dish towels are much more absorbent than pure linen or cotton towels. Whether you're drying flatware, pots, pans, high quality porcelain dishes or earthenware – a single wipe is enough for a streak-free dry surface.

Even after multiple washings, these high-tech towels remain lint-free, fleecy and soft and they retain their shape.

**Perfect, rapid and effective drying!**
