

Leather balm

Pro Cleaner Series

PRODUCT DESCRIPTION

The leather balm can be used in all applications where high-performance protection is needed. The balm penetrates into the leather, protecting it and leaving it supple and breathable. It prevents any soiling due to snow or water-marking, and has no expiry date. Contains pure beeswax and carnauba wax.

Can be used on leather shoes, belts, accessories, and clothing, old convertible seats (to give a sheen effect), balls, saddles and riding equipment, rubber, plastics, and for all different colour shades... for all applications where high protection with a sheen effect is required/desirable. **Only use leather balm for flat, shiny leather. Not suitable for use on dull leathers or full-grain leather.**

TO USE

The balm can be applied and removed using the specialised microfiber brush included (rough side). Use the fleece side for a final polish.
