

Leather Cleaner

Cleaning Set

PRODUCT DESCRIPTION

MERX Leather Cleaner is a highly-effective cleaning agent composed of amphoteric, non-ionic detergents and cleansers. Its balanced composition means it can remove the toughest of stains. The Leather Cleaner contains an ingredient which leaves a refined, shiny finish on the leather after cleaning.

TO USE

MERX Leather Cleaner can be sprayed onto leather surfaces directly in undiluted form. The specialist foam nozzle produces a fine-pored foam which works to boost the product's stain-removing properties.

Working in circular motions with a soft brush, sponge or microfibre cloth, stains can be removed and then the included microfibre cloth can be used to remove any residue. The process can be repeated if required. Finally, apply a leather sealant or activator.
