

# Microfibre Soft Cloths

## Antibacterial | terry

### PRODUCT DESCRIPTION

These high-tech microfibre cloths are the latest innovation in the soft cloths segment! Despite the light weight of 160 g/m<sup>2</sup>, the cloths offer 400% water absorption and are comparable with conventional microfibre terry cloths. The use of silver particles in the individual micro fibres gives the cloth a long-lasting antibacterial effect. The new production technology (with colour fused in the fibres) ensures the cloth features absolute colour stability. The cloths have been tested and certified by the Hohenstein Institute for Hygiene, Environment & Medicine, confirming an outstandingly strong antibacterial effect. Quickly and effectively removes even stubborn dirt without leaving streaks or the need for drying.

### TO USE

Universally versatile on all sealed surfaces. Ideal for cleaning all surfaces, fronts, objects, mirrors and glass. Exercise care when using on stained, painted and waxed surfaces!
