

# Microfiber wine glass and decanter cloth

with Silver yarn

Dimensions  
50 x 60 cm

## PRODUCT DESCRIPTION

The risk of bacterial transmission is particularly high while using drinking glasses. Using this new silver yarn microfiber cloth kills germs and guarantees hygienic purity with no bacteria. The cloths are made from ultra microfibers, and the capillary action is sped up significantly by an extremely high level of fiber splitting. Just one wipe gives you streak and lint-free shine for high quality glasses, carafes, decanters, mirror and glass surfaces and glass ornaments! Cleans pore-deep and germ-free without the use of chemicals. Wash glasses and then polish dry with the cloth.

### SILVER YARN MICROFIBERS

**Universal microfiber cloths provide 99.9% surface sterility! Bacteria and germs are removed from the cloth by washing. There are two applications that remove these from the fibers before this:**

- 1 Antibacterial design. Germs remain in the cloth but are unable to multiply further.
- 2 Cloth design with pure silver –germs are killed off due to this.
