CERTIFIED COMPANY

ISO 9001  
ISO 14001

Get shiny, streak- and lint-free glass surfaces with the new high-tech AN-TIBAC Glass & Mirror fleece cloth. Clean windows, doors, glass-top tables, mirrors etc. quickly and effectively in just one step. Even with their very low density at 160 g/m<sup>2</sup>, these highly compressed microfiber cloths can absorb liquids up to 400%. A special treatment provides long-term antibacterial protection and the new effect-manufacturing technology with dyes fused into the fibers means they will never lose color.

The cloths have been tested and certified by the „Hohenstein Institute for Hygiene, Environment & Medicine“ as having above average antibacterial activity.

### TO USE

Wet cloth, wring out well (moist), fold and use. Cleaning power improves after the first wash. Universal and idea use for cleaning all surfaces, panels, objects, windows, mirrors and glass surfaces.

**Use with caution on stained, painted and waxed surfaces!**
