PRODUCTS

FEATURES

- › Permanent antibacterial effect
- › Hohenstein certified (HC-244326)
- › Completely color-fast
- › Washable and reusable
- › Very high water absorption
- › Suitable for universal use
- › Removes even heavy soiling quickly and effectively

PRODUCT SPECS

Material:	100 % Microfibre
Colour:	light green
Size*:	30 x 40 cm
Weight*:	140 g/m ²
PU:	24 units/box
Washing:	Recommended at 60 °C
Item-No.:	100560
GTIN:	9120017750789

* Approx data

These high tech microfibre cloths are the latest development in the field of non-woven cloths! Despite their low weight at 140 g/m², the cloths have a high level of water absorption and are similar to conventional microfibre terry cloths. The cloth retains its antibacterial effect permanently due to the use of silver particles in the individual microfibrils. The new manufacturing technology (color melted into the fibers) ensures that the cloth is completely color-fast. The cloths have been tested and certified by the "Hohenstein Institute for Hygiene, Environment & Medicine", which has shown them to have a higher than average antibacterial effect.

TO USE

Suitable for universal use on all sealed surfaces. Is ideal for use for cleaning all surfaces, front panels, objects, mirrors and glass. Caution when using on stained, painted and waxed surfaces!
