

Microfibre Non-woven Pad

Antibacterial | 2-pack

PRODUCT DESCRIPTION

The high tech microfibre non-woven pad is the latest development in the field of non-woven pads! The microfibre non-woven pad retains its antibacterial effect permanently due to the use of silver particles in the individual microfibers. The new manufacturing technology (color melted into the fibers) guarantees that the microfibre non-woven pad is permanently color-fast. The non-woven pad has been tested and certified by the "Hohenstein Institute for Hygiene, Environment & Medicine", which has shown it to have a higher than average antibacterial effect.

TO USE

Suitable for universal use on all sealed surfaces. Ideal for cleaning tiles, stainless steel sinks, faucets and for cleaning all household surfaces. Caution when using on stained, painted and waxed surfaces!

FEATURES

- Permanent antibacterial effect
- Hohenstein tested (Test no. 16.8.9.0002)
- Completely color-fast
- Reusable
- Washable
- High water absorption

TECHNICAL DATA

| | |
|-------------------|--|
| Material: | 100% microfibers (PES/PA), Inner core 100 % PU |
| Color: | light green |
| Size*: | 15 x 20 cm |
| Weight*: | 380 g/m ² |
| PU: | 2-pack, 24 units/box |
| Washing: | Recommended at 60°C |
| Art-No.: | 100703 |
| EAN: | 9120017751700 |
