

NETEX ECO Oven Cleaner Set

PRODUCTS DESCRIPTION

The NETEX ECO Oven Cleaner Set was specially created for the professional cleaning of ovens, pots, stainless-steel pans, aluminium, fireproof glass, ovens etc. Using the highly concentrated and ecologically compatible cleaner developed for **industrial and gastronomic applications**, surfaces are cleaned quickly, hygienically and extremely gently. The stainless-steel grill cleaners (**40 g**) are washable and reusable.

The new antibacterial micro-fibre oven duo pad is the ideal combination for quick and thorough use. The dark-grey PP brushes are ideally suited to the easy and effortless removal of stubborn dirt. The blue silver-yarn side can be used for hygienic wiping as well as for all other applications in the kitchen and household.

TO USE

Apply a small undiluted quantity of the cleaning agent on the surface to be cleaned. Heat up heatable surfaces to 60-80 °C if necessary. Allow 5-15 minutes for the cleaning agent to take effect; then rinse with plenty of water or wipe off the surface with a wet cleaning pad. In case of heavy encrustation, use NETEX stainless steel-cleaner.
