

# NETEX Sponge Cloth Eco

100% eco | compostable

## PRODUCT DESCRIPTION

NETEX's ECO sponge cloths help you protect the environment. Sponge cloths are made using sustainable raw materials, including cellulose and cotton fibres: the combination of these natural products results in a unique cloth that shows outstanding absorbency, durability and sustainability. Bacteria and other germs are easily picked up and removed in the waste water. The cloths are compostable, decomposing<sup>1</sup> naturally and thus you can dispose of them without worry.

## TO USE

Moisten the sponge cloth, wring it out and then wipe surface clean with the damp cloth.

**As a private label**, shape, colour, thickness and grammage is variable. Cloths come in standard colours: yellow, red, blue, green and apple green.

On special request for **promotional material**, cloths can also be made with a motif or random print. This lets the marketing message stay visible for your customers for a longer period.

<sup>1</sup> Note: decomposition test
