PRODUCT DESCRIPTION

The MERX Pro Cleaner sanitation unit cleaner has been specially developed for professional cleaning in all sanitation areas. It contains anti-corrosion and fixture protection additives and provides the best results with the microfibre mop products. The Universal microfibre bath mop[1] from the professional range is specially suited to cleaning all tiles (walls) in bathroom and sanitary areas. The fluffy Soft bath mop[2] is designed for drying tiles and glass shower cubicles and shower doors, as well as coated plastic material.

TO USE

Spray the cleaner thinly onto the surfaces to be cleaned and remove with the Universal bath mop.

Spray cleaning: depending on the level of dirt, add ½ (12.5 ml) to 1 (25 ml) dosage cap of concentrate to a 500 ml spray bottle. Top up with cold water. This gives you up to 40 bottles of cleaner.

Normal cleaning: Add 1 dosage cap (25 ml) of concentrate to 4 litres of cold water.
