

# Screen Bamboo Cotton Cloth

## PRODUCT DESCRIPTION

This screen cloth made from pure bamboo cotton fibers is particularly suitable for screen surfaces due to its method of production and extremely fleecy texture, and is made from purely renewable raw materials. Because different displays are often sensitive, pure classic microfibers have purposefully not been used. The cloth is also ideal for cleaning different office equipment, such as IT accessories, telephones, PC housing, keyboards etc. You can use this high performance cloth in the same way as a microfiber cloth – dry for dusting or wet with or without a cleaning agent for your daily cleaning activities.
