

Screen cleaning set

in gift box

PRODUCT DESCRIPTION

The screen cleaning foam is a newly developed special cleaner for monitors, screens, tablets and smart phones and has been specially adapted to and tested on sensitive and high quality surfaces. At the same time, the surface is sealed. The cleaning foam is best used in combination with the specially developed screen cloth.

This screen cloth made from pure bamboo cotton fibers is particularly suitable for screen surfaces due to its method of production and extremely fleecy texture, and is made from purely renewable raw materials. Because different displays are often sensitive, pure classic microfibers have purposefully not been used. The cloth is also ideal for cleaning different office equipment, such as IT accessories, telephones, PC housing, keyboards etc. You can use this high performance cloth in the same way as a microfiber cloth – dry for dusting or wet with or without a cleaning agent for your daily cleaning activities.
