

Tube Squeezer

Get everything out! No remainders

PRODUCT DESCRIPTION

This specially designed tube squeezer empties every tube without any remainders! Many products such as mustard, mayonnaise, tomato puree, creams, hair colors, glues, toothpaste, paints, ointments and much more are commonly packaged in tubes. When these tubes are nearly empty, the problem of emptying their remaining contents arises. It is not unusual for around 10% of their contents to end up being thrown away. The tube squeezer is designed to help you get even the very last bits of a tube's contents out.

By using this product, money can be easily saved in a self-explanatory way while using high quality, expensive products. The tube squeezer is designed so that it does not have to be kept pressed together during the squeezing process, instead rotating the tube through two rollers that are made of specially reinforced hard plastic, enabling them to work on every tube.
